Office Action Summary	Application No. 10/749,403	Applicant(s) CHU, ARTHUR	
	Examiner Jessica Laux	Art Unit 3635	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 1 is objected to because of the following informalities: In line 4 of claim 1 change "housed" to "housing". Appropriate correction is required.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Benson et al. (5175975).

In regards to claim 1: Benson et al. teaches a multi-layer vacuum assembly-enabled fundamental building material for strengthening safety of a building structure, comprising: a main body housing a plurality of vacuumized multi-layers from said exterior towards said interior thereof (Col. 3, lines 59-63), said vacuumized multi-layers being divided by a plurality of spacers (16 and Col. 3, lines 52-58), said main body having a shape designed according to requirements of said building structure (Col. 8, lines 65-66); having a first latch section (Figure 2, element 18 on the right side) located on an outer side of said main body; and a second latch section (Figure 2, element 18 on the left side); wherein said first latch section and said second latch section on one fundamental building material are engageable (they can be welded together) with a second latch section and first latch section of another fundamental building material in a serial fashion to form an assembled fundamental building material.

In regards to claim 2: The multi-layer vacuum assembly-enabled fundamental building material according to claim 1, wherein said main body is made of metal (Col. 4, lines 8-9).

In regards to claim 3: The multi-layer vacuum assembly-enabled fundamental building material according to claim 1, wherein said first latch section has a protrusive section extending outwards (Figure 2, element 18).

In regards to claim 5: The multi-layer vacuum assembly-enabled fundamental building material according to claim 1, wherein said first latch section and said second latch section are two guide tracks (element 18 where the protrusions can be a guide track).

Allowable Subject Matter

Claims 4 and 6-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jessica Laux whose telephone number is 571-272-8228. The examiner can normally be reached on Monday thru Friday, 8:30am to 4:00pm (est).
